

Correction of Specification Amendment:

In a document entitled "Supplemental Paper Correctly Amending Reissue Application" that was part of a Response filed December 23, 2002, there are two paragraphs that begin with the text "Amend the paragraph at Col. 5, lines 46-58, as follows". In the first of these there is a typographical error. The reference to lines "46-58" should read "3-13". Hence this first paragraph read as follows.

Amend the paragraph at Col. 5, lines 3-13, as follows:

FIG. 2 illustrates 9 transducer cells 110 [(not labelled in FIG. 2 due to crowding in the figure, but labelled in FIG. 1)], 120,130,140,150,160,170,180,190 and their corresponding acoustic transducers 115,125,135,145,155,165,175,185,195. In the composite implementation, each transducer is mounted to its corresponding cell in the same manner that transducers are connected to semiconductor substrates in IR focal plane arrays or the like. The dotted lines are provided to indicate that the number of cells is variable and may be modified in either dimension. Cell 150 is surrounded by a dashed line and will be described as a representative cell.
